

ORGANIZATIONAL PROFILE

Institutional funding and technical partnership brief | September 2026

20,000+ KG OF WASTE REMOVED

YSI public impact claim. Sustained field work is documented; original mass-calculation source is being reconstructed.

LEGAL STATUS

Public brand: YSI Africa

Constitutional name: Young Sustainability Initiative

Legal form: Company Limited by Guarantee, Sierra Leone

Company No.: SL100426YOUNG29718 | Registered: 10 April 2026

Registering authority: National Investment Board of Sierra Leone

OPERATING MODEL

Cleanup -> Measurement -> Characterization -> Recovery -> Validation -> Replication

Field experience at Lumley Beach informs localized waste-interception and circular-resource-recovery development.

YSI does not position itself as Freetown's official municipal waste collector and will coordinate with competent authorities.

Flagship concepts remain development-stage until technical, regulatory, environmental and economic evidence supports scale.

ACCOUNTABILITY & CAPACITY

- Interim financial-management and internal-control framework effective September 2026.
- Adopted working safeguarding policy and code of conduct; implementation mechanisms are still being strengthened.
- Interim health, safety and field-operations standard covers risk assessment, PPE, incident reporting and waste handling.
- Current Board/director register and institutional bank-account evidence remain explicit due-diligence priorities.

INSTITUTIONAL CONTACT

info@ysiafrica.org | <https://ysiafrica.org>

For funding, technical assistance, implementation collaboration and due-diligence enquiries.

Evidence note: The historical 20,000+ kg figure has not been independently verified because the original calculation record has not yet been recovered. Future pilot monitoring will use auditable weight and mass-balance records.

YSI Africa publishes claims according to current documentary evidence and labels unresolved institutional gaps openly.
